Credits:	8 ECTS
Costs:	CHF 2'450.-
Target audience:	TCM-specialists, therapists, doctors
Language:	German
Opportunities*:	Credits recognition to Certificate of Advanced Studies (min. 10 ECTS)

Dear TCM enthusiasts,

We cordially invite you to take your therapeutic skills to a new level! Have you ever wished you could offer your patients more than just acupuncture? Perhaps you are facing challenges where the use of acupuncture alone is not enough.

We present you with the solution! Take part in our fascinating series of courses on classical Chinese medicine according to Jing Fang and discover how you can treat your immunocompromised and chronically afflicted patients with comprehensive Chinese medicine.

Five exciting courses are taught according to the experiences and teachings of the best Chinese Jing Fang teachers and researchers such as Liu Du-Zhou, Hu Xi-Shu, Feng Shi-Lun or Huang Huang. Prof. Dr. med. univ. Sandi Suwanda will give you a deep insight into Chinese medicine.

Our proven experience shows that the understanding of Chinese herbal medicine is easier through the practical application of classical formulations than the isolated study of individual herbs.

Jing Fang represents the method of formulation teaching, and in this unique course series you will first learn about the formulations and their clinical application before moving on to the specific effects of the individual herbs.

## Content: Teaching of Jing Fang (8 ECTS credits)

Lecturer: Prof. Dr. med. univ. Sandi Suwanda

- Part 1: Introduction to Jing Fang and the theoretical basis of Shang Han Lun.  
*10.02. - 11.02.24*
- Part 2: The symptom-related classification of the Liu Jing (6 syndromes) as well as clinical case presentations of Hu Xi-Shu and Feng Shi-Lun.  
*16.03. - 17.03.24*
- Part 3: The most important therapeutic approaches of Jing Fang from the perspective of Liu Du-Zhou and clinical case presentations by Liu Du-Zhou.  
*13.04. - 14.04.24*
- Part 4: The constitutional types of the classical formulas according to Huang Huang and clinical case presentations by Huang Huang  
*11.05. - 12.05.24*
- Part 5: Practical course with learning the dynamic pulse palpation according to Nogier, the so-called RAC (Reflex auriculo cardiaque) as well as the clinical application of the Chinese formulation testing.  
*01.06. - 02.06.24*

### Competence:

- Knowledge and understanding of "Jing Fang" with important classical formulas
- Applying knowledge of "Jing Fang" to common clinical pictures
- Judgment in differential diagnosis based on case studies with classical formulas
- Promotion of self-learning ability through practical exercises with Prof. Suwanda's questionnaire
- Communication and discussion of findings in the group

\* Certificate of Advanced Studies (min. 10 Credits)

Workload approx. 300 hours

Final thesis optional
